JOB TITLE

Entry-level full stack developer with experience in ruby-on-rails and javascript-related programming. Passionate about small-business, international, and psychosocial development, education, social justice, and the arts. Possess extensive experience in project planning, implementation and completion, in addition to strong skills in organizational and interpersonal development. Experience working in diverse industries to include government, international development, not-for-profit, for-profit small business, higher education and consultative sales. Enthusiastic to learn more skills in object-oriented programming.

TECHNICAL SKILLS

Entry-level experience with Ruby, Rails, Javascript, React, React Native, Redux, HTML, CSS, Semantic UI, Bootstrap UI, and Git.

TECHNICAL PROJECTS

Muse - Github: [jjenkins120/muse-frontend](#), [jjenkins120/muse-backend](#) | Demo: <https://youtu.be/stl8TwOoS98>

Social Media App for Artists where Artists can be inspired by other work, regardless of medium, and contribute work based on those inspirations. Artists can track other artists' inspirations as well.

- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Incorporated Ruby on Rails for backend API complete with complex modeling structure to include multiple self-referential and self-containing models.
- Employed React with Redux and Semantic UI for frontend development
- Included complete CRUD functionality associated with user profiles, posts, and comments.

Veggie Delight - Github: [joannabpark/mod3-project](#) | Demo: <https://youtu.be/5cOxizZCYBs>

Social Media Dating App designed specifically for vegetarians. Upon login, users are paired with other users and can choose to match with those users. Matches are stored in the user's profile.

- Utilized Ruby on Rails for backend API
- Incorporated Vanilla Javascript and Bootstrap UI for frontend development
- Included complete CRUD functionality associated with user's profile
